

CARDIAC SCIENCE POWERHEART® G5 AED UNIT

The Cardiac Science Powerheart® G5 Automatic External Defibrillator is considered one of the most reliable AED units available within Australia.

UNIT FEATURES:

- Easy to use AED for responders at all levels;
- IP55 High ingress protection against water and dust for optimal performance in the toughest environments (ideal for taking outside classrooms, onto sporting fields or playgrounds);
- Meets the highest of military standards for vibration, shock and drop testing (up to 1.5mt);
- RescueCoach™ user-paced prompts to guide responder through each critical rescue step;
- Extra assistance through text prompts to provide additional coaching in noisy and chaotic environments;
- Intuitive, interchangeable pad simplifies positioning;
- Assesses patient's therapy needs and delivers a customised fully automated shock at an appropriate energy level in as little as 10 seconds;
- A highly visible Rescue Ready® indicator ensures a working AED is available to responders at all times;
- Rescue Ready® technology conducts self-checks of battery, hardware, software and pads daily, partial charge of the high voltage electronics is conducted weekly, and a full charge carried out monthly;
- Easy to update settings if resuscitation guidelines change;
- Quickly transfer and review data via USB;
- Unit lifespan is in excess of 20 years

**A defibrillator is as essential as your Fire Extinguisher,
give your staff the tools to save a life!**

Defib for Life is a not-for-profit organisation whose primary focus is to raise awareness on the importance of have an AED in your school, workplace & community. Our goal is that No Australian will be further than 10 minutes away from a defib unit. With every **minute** that passes after the arrest, the chance of survival **decreases by 10%**. These life saving devices are the only treatment for a Sudden Cardiac Arrest (SCA).
